Why Does One Person Make a Good Decision

Your Life Your Adventure / 15/07/2017 / General Post

Why does one person make good decisions and someone else make a bad one?

The Decisions you make are controlled by your state and your blueprint.

Questions you should be asking of yourself:

- How can you change your state?
- How can you change your blueprint?
- Who would you be if you could do that?
- Where would you be if you could be in the right state and blueprint? (for you).
- Does your state and blueprint serve you well now?
